

# Ali Ahmed

(438) 622-3270 | Montreal, QC | aliahmed.codes@gmail.com | linkedin.com/in/aliahmed222 | github.com/AliCodes22

## Summary

---

Full Stack Developer with substantial hands-on experience with JavaScript and TypeScript across the front-end (React) and back-end (Node.js), along with styling libraries (Tailwind CSS), and state management tools (Redux, React Query). Keen problem solver and fast learner with projects focused on clean architecture and performance.

## Education

---

<b>Georgia Institute of Technology</b> – Master of Science, Computer Science (Part-Time)	Expected 2026
<b>Western Governors University</b> – Bachelor of Science, Computer Science	November 2024

## Skills

---

**Languages:** JavaScript, TypeScript, Java, HTML, CSS

**Databases:** MySQL, PostgreSQL, MongoDB

**Frameworks and Libraries:** React, Redux, Next.js, Node.js, Express, Tailwind CSS

**Tools:** AWS, Git, Docker, Postman, Prisma

**Certifications:** AWS Solutions Architect Associate, AWS Developer Associate, Microsoft Azure Fundamentals

## Experience

---

**Full Stack Developer**, Self-Employed – Montreal, QC January 2022 – Present

- Built responsive UIs with React and Tailwind CSS, improving usability and accessibility across multiple projects
- Developed RESTful APIs with Node.js, integrating SQL and NoSQL databases to support real-time features

**Investment Representative**, Scotiabank – Montreal, QC April 2024 – Present

- Increased operational efficiency by 35% by streamlining workflows, earning the Diamond Award for Q1 2025
- Analyzed service quality data to implement resolution strategies, achieving a sustained 100% resolution rate

**Manager**, Rogers – Montreal, QC September 2019 – February 2024

- Converted Power BI insights into coaching strategies, achieving team performance among the top 5 regionwide
- Launched data-driven CRM outreach campaigns that exceeded revenue targets across multiple quarters

## Projects

---

**Patientor | React, Node.js, TypeScript, MaterialUI**

- Developed a patient management app with validated forms, REST APIs, and responsive UI components
- Implemented TypeScript for type safety and Material UI for consistent, accessible design

**Gearhub | React, Node.js, Express.js, MongoDB**

- Led the backend architecture of an e-commerce platform using Node and Express in an Agile environment
- Collaborated with a 3-member team to build RESTful APIs and optimize database queries for performance

**Product Management Dashboard | Next.js, Shadcn, Material UI, Tailwind CSS**

- Designed a scalable, responsive dashboard to add, edit, and delete products with form validation
- Composed reusable UI elements with Shadcn and Material UI, and structured routing using the App Router

**Speedy Slice | React, Redux Toolkit, React Router, Tailwind CSS**

- Built a meal-ordering app with seamless routing and shared state management using Redux Toolkit
- Developed a mobile-first UI with Tailwind CSS and integrated React Router for efficient navigation

**Mini DNS Service | Node.js, Express.js, REST API**

- Created a DNS API service that handles A and CNAME records with real-world constraints and behavior
- Ensured input validation for hostnames and IP addresses, returning meaningful HTTP status codes
